

GlassTouch

Marketing Opportunity

We offer a new, innovative approach in design of capacitive touch sensors. Our switch has integrated touch sensor and all of the necessary components. Each switch is also preprogrammed with the unique software. The switch can operate in a standalone mode and also as a key in a keyboard matrix.

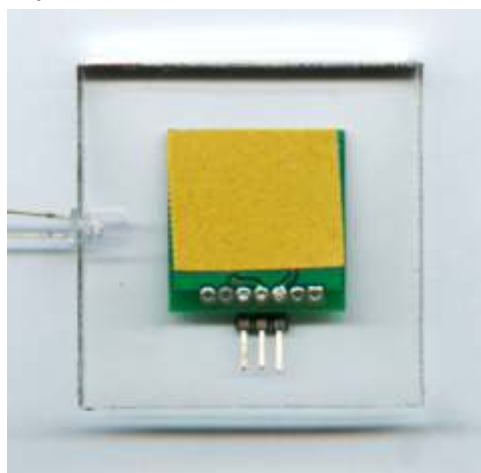

Advantages:

- Low cost
- Can be used with extremely thick glass (up to 18mm)
- Can be used with other non conductive materials (wood, plastic, etc.)
- End user can adjust all operating parameters
- Self-calibration ability
- Open drain output (24V, 1A)
- End user can customize built-in LED behavior
- Shock, Impact and Vibration resistant
- Extended temperature range operation
- Operate outdoors in any weather condition

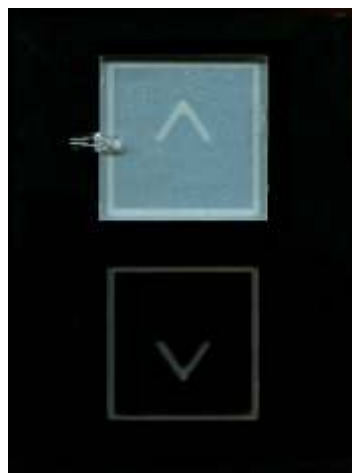

We would like to talk to companies interested in developing the commercial opportunity that this product represents. Please contact us to discuss this further.

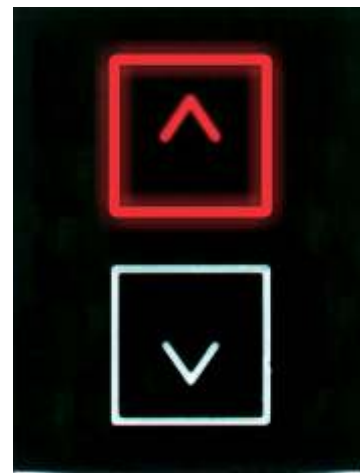

Examples of use: Elevator

a)

b)

c)

a) GlassTouch stuck with double-sided tape on glass block, b) backside of control panel, c) front side

Many companies are already using our product for the outdoor marketing
